DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 29-37, 61-63, 67-69 drawn to a nucleic acid oligomer modified by attaching a redox active substance, method of producing same.

Group 2, claim(s) 38-55, 70, 72-83 drawn to a modified conductive surface, method of producing same, and method of using.

Group 3, claim(s) 56-60, 64-66, 71 drawn to method of producing a modified conductive surface comprising a nucleic acid modified by a redox active substance selectively oxidizable and reducible at a potential ϕ .

The inventions listed as Groups 1-3 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: group 1-3 are directed to different technical features. Group 1 is directed to a modified oligomer, group 2 to a conductive surface and group 3 to a conductive surface of a specific potential.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
